Book overview

The world of work is experiencing an unprecedented transformation driven by technology. *The Digital Renaissance of Work: Delivering digital workplaces fit for the future* will immerse the reader in the trends and themes that characterize this extraordinary period in the evolution of work.

A unique combination of thought leadership and practical advice, this book will bring the reader up-to-date with the latest developments, such as: no jobs but lots of work; the new digital work ethic; why “teamwork” needs a makeover; the human-centred digital workplace; what this means for physical workplaces; and why the revolution starts with education.

It also provides essential guidance on how to deliver a productive and engaging digital workplace in your organization, explaining how to: assess maturity; make the business case; set up the programme; and measure progress.

The book draws on case studies from pioneers in the digital workplace such as Barclays, Cisco, Microsoft, PwC, the United States Patent & Trademark Office and Virgin Media.

In this follow-up to his critically acclaimed book *The Digital Workplace: How technology is liberating work*, Paul Miller, CEO and founder of the Digital Workplace Group (DWG), is joined by co-author Elizabeth Marsh to pick up the story and help organizations create digital workplaces fit for the future. The insights offered by this book are underpinned by DWG’s extensive benchmarking and research knowledge base.

Table of contents

Foreword by Brian Solis

Part 1: Exploring the digital renaissance of work

- Chapter 1: Plentiful work we enjoy – a first in human history
- Chapter 2: The human-centred digital workplace
- Chapter 3: Where will we work in the physical world?
- Chapter 4: Collaboration – why “teamwork” needs a makeover
- Chapter 5: There are no jobs – but there is lots of work
- Chapter 6: Leaders need followers
- Chapter 7: The price we pay
- Chapter 8: Education – the revolution starts here
- Chapter 9: A future fit for work

Part 2: Delivering digital workplaces fit for the future

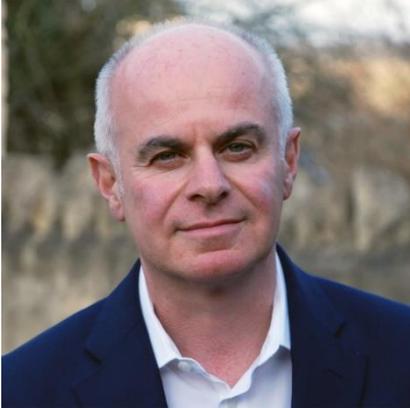

- Chapter 10: Your digital workplace journey
- Chapter 11: Making the business case
- Chapter 12: Designing for a flexible workforce
- Chapter 13: Setting up the digital workplace programme
- Chapter 14: Measuring progress and performance

Appendices

- Appendix 1: Rolling out Spark, PwC’s transformative global collaboration platform
- Appendix 2: The journey towards the Cisco Connected Workplace
- Appendix 3: Creating a better place to work: Microsoft’s Workplace Advantage Programme
- Appendix 4: Engaging employees and joining up the organization: the Virgin Media digital workplace

About the authors

Paul Miller, CEO of the Digital Workplace Group (DWG)

Paul Miller ([@paulmillersays](#)) has been at the heart of the work and technology revolution for 20 years. He is CEO and Founder of the Digital Workplace Group and author of *The Digital Workplace: How technology is liberating work* and *Mobilising the Power of What You Know*. He has given many inspirational keynote talks on the digital future of work to senior executives and addressed large employee events at Microsoft, Google and Adobe.

For five years he hosted internet radio show Digital Workplace Live and was Executive Producer of IBF24 and DW24. After an early career as a City editor and speechwriter, he published the influential WAVE magazine.

Elizabeth Marsh, Director of Research for the Digital Workplace Group (DWG)

Elizabeth Marsh ([@digitalsanity](#)) is a writer and researcher with a background in intranet and knowledge management at companies such as Reuters and T-Mobile (UK).

She manages Digital Workplace Group's best practice research programme, which provides organizations with practical insights and thought leadership across intranet and digital workplace topics. She also regularly works with DWG clients on consulting projects.

Author quotes

“The industrial revolution turned us into machines. Now the digital revolution has the power to restore us as human beings. This book explains why this is happening, what it means to us as individuals and for organizations, and examines how we can all seize this opportunity.”

- Paul Miller

“For digital workplace professionals grappling with the impact of digital disruption inside organizations, this book provides a ‘how to’ guide that covers the practical details of what to do about it – plus a compelling vision of the digital future of work.”

- Elizabeth Marsh

Reviews

“Paul and Elizabeth live at the forefront of the digitization of work, but remain primarily focused on people and the impact of technology on the human condition. The Digital Renaissance of Work provides a fresh and refreshingly optimistic insight into how we’ll work in the future.”

- Ryan Anderson, Herman Miller – Director of Future Technology

“As the digital workplace becomes the borderless enterprise, this book demonstrates pragmatic foresight on the integration of, and augmentation with technology, never losing sight of the fact that humans are at the center of the digital workplace.”

- Steve Tiell, Accenture – Global Head Technology Vision

“The future work agenda is gathering pace. In this optimistic and informative book, Miller and Marsh offer a guide to the thorny challenge of making digital workplace strategies more human.”

- Alison Maitland, co-author of Future Work

“One of the most comprehensive, complete and compelling journeys toward the new frontier of the digital workplace. The latest work by Paul Miller and Elizabeth Marsh offers one of the most thorough roadmaps for the digital traveller, who wants to be ready for the work environment of tomorrow. Nothing is omitted from this powerful narrative that touches on technology, but also on processes and even the psychology and ethical make-up of the digital workplace of the future.”

- Giovanni Piazza, Johnson & Johnson - Discovery Sciences

“The impact of accelerating digital and physical convergence as our work life transforms toward the digital + physical blur is well represented in this new book by Paul Miller and Elizabeth Marsh. Digital workplace transformation will enhance human performance and innovation across all industry sectors. Digital workplace transformation will further enrich our daily human life experience and our daily work life experiences.”

- Peter Miscovich, JLL (Jones Lang LaSalle)

“This book gets to the fundamentals of work in the digital realm of organisations today. Miller and co-author Marsh offer a humanist perspective on the fast digitisation of what used to be office-based work. It first stimulates our thinking and then, based on the vast and rich history of the Digital Workplace Group, situates these ideas in real and practical case material. This book will prepare you for the new age of work in organisations.”

- John Baptista, Warwick Business School, UK
